

Name_____

Metrics and Measurement

In order to be successful during this unit, the following learning targets should be mastered. Write the DATE in the blank under P or M when you evaluate your understanding of each learning target. This sheet will be completed, stapled to the unit review sheet and turned in when the test is taken. **P=progressing M=mastery**

	P	M	Learning Target
1			I can determine the proper metric unit to use when measuring mass, volume, and distance.
2			I can choose appropriate equipment to measure mass, volume, and distance.
3			I can estimate the approximate amount of mass, volume, and distance in appropriate units [such as millimeters vs. meters].
4			I can rank and correctly represent metric units from smallest to largest or visa-versa [from micro to mega].
5			I can convert from one metric unit to another [such as mL to L]
